

Towmasters Proudly Presents

BIG RIG RESCUE

Instructed by : BILLY LEACH JR.

Realistically staged scenarios will provide comprehensive training in the topics of Heavy and Light lifting, cutting, cribbing and strut support operations. Underrides/overtorns, and Big Rig anatomy and extrication. Full sized damaged vehicles will be used as casualties providing challenging opportunities as the attendees travel "*Hells Highway!*"

Don't miss this opportunity to attend the best offering available. Work along side recovery professionals of **Towmasters** and learn the best, safest and most efficient techniques for heavy lifting and stabilizing of large and small vehicles. **Attendance is limited to ensure maximum participation of each person.**

If you have further questions please contact Don "Hulk" Gagnon @ (603) 335-2084 email: hulk@rochestertruck.com **This class sells out so don't delay!!!**

This program is not intended for the unmotivated however, it is designed to challenge Fire and Rescue personnel.

Take this information to your local Fire Department TODAY! Your local fire department will appreciate you bringing this great opportunity to their attention. A Fire Department that learns the value of a Tower at an accident scene will benefit you!!!!

Big Rig Rescue
